

# Alternatives Retained for Detailed Study

1, 4, 5C, 7C and 7D

**Goal: To strike a balance among many factors**

- **All Retained Alternatives, except Alternative 1 (No-Build), meet the project Purpose and Need.**
- **The Retained Alternatives as a group represent examples of the solutions found in the full range of alternatives.**
- **All but Alternative 1 would provide better traffic performance.**
- **The Working Group, the Resource Agencies and the Public recognize that:**
  - **Some alternatives more effectively address the Project Purpose and Need**
  - **Community and environmental impacts vary among the alternatives**
  - **Detailed study is needed to refine the alternatives analysis and provide sufficient information to select a preferred alternative**
